## Add User page. The user is added after filling the "User Name" field with invalid data

 Attach

 Create subtask

 Link issue

Priority  High

### Description

The user is successfully added after filling the "User Name" field with invalid special characters (@).

### Preconditions:

1. Go to the site  [TS Trainee course](#)
2. Click the "Add User" button in the header

### Steps to reproduce:

1. Fill in the "User Name" field with **invalid data** (@@Ss)
2. Fill in the "Year of Birth" field with any valid data (e.g. 1901)
3. Click the "Create" button
4. Pay attention to the data in the "User Name" field of the added user

**Actual result:** The user is added on the "Add User" page after filling in the "User Name" field with invalid data

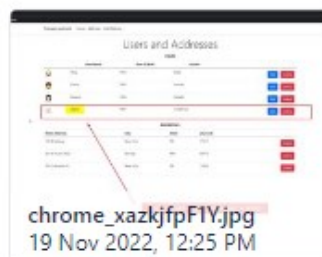

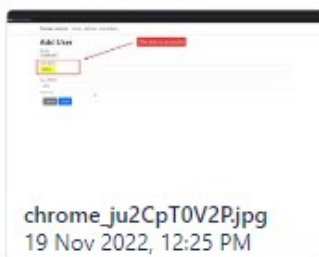

**Expected result:** The user isn't added on the "Add User" page after filling the "User Name" field with invalid data

### Environment

- **OS:** Windows 10 x64

The [Requres.in](#) site bug reports

## Reqres.in API. Response returns with "200 OK" status after sending the invalid POST login request

Attach

Create subtask

Link issue

Priority

Medium

### Description

The response returns with "200 OK" status after sending POST login request with the invalid password of the registered user. The user is successfully logged in using invalid password.

### Preconditions:

1. Open the Postman

### Steps to reproduce:

1. Execute REST request:

Method: POST

URI: <https://reqres.in/api/login>

Headers:

Content-Type: application/json

Accept: \*/\*

Body:

```
{
  "email": "eve.holt@reqres.in",
  "password": "Incorrect Password"
}
```

2. Check the response
3. Pay attention to the **200 status** and response body

**Actual result:** The response returns with "200 OK" status after sending POST login request of registered user with the invalid password in the request body.

*Response returns with the body:*

```
{
  "token": "QpwL5tke4Pnpja7X4"
}
```

**Expected result:** The response returns with "400 Bad Request" status after sending POST login request of registered user with the invalid password in the request body.

*Body example:*

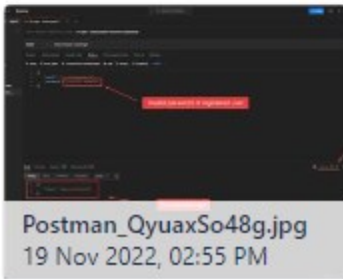

```
{  
  "error": "Missing password"  
}
```

#### Environment

- **OS:** Windows 10 x64
- **Platform:** Postman v10.3.5

## Reqres.in API. The response returns with outdated information about the user

Attach

Create subtask

Link issue

Priority

Medium

### Description

The response returns with outdated information in the "first\_name" and "last\_name" fields of recently updated user data with id:4 after sending GET request

### Preconditions:

1. Open the Postman
2. The information about the user with id: 4 must be updated:
  - "first\_name": "Valerii",
  - "last\_name": "Tester".

### Steps to reproduce:

1. Execute REST request:
  - Method: GET
  - URI: <https://reqres.in/api/users/>
  - Headers:
    - Accept: \*/\*
  - Params:
    - "id": "4"
2. Check the response
3. Pay attention to the **data** in the "**first\_name**" and "**last\_name**" fields

**Actual result:** The response returns with outdated information in the "first\_name" and "last\_name" fields of recently updated user data with id:4 after sending GET request.

*Response returns with the body:*

Body:

```
{
  "data": {
    "id": 4,
    "email": "eve.holt@reqres.in",
    "first_name": "Eve",
```

```
"last_name": "Holt",
"avatar": "https://reqres.in/img/faces/4-image.jpg"
},
"support": {
  "url": "Reqres - A hosted REST-API ready to respond to your AJAX requests",
  "text": "To keep ReqRes free, contributions towards server costs are appreciated!"
}
}
```

**Expected result:** The response returns with updated (in T73 test case) information in the "first\_name" and "last\_name" fields about user data with id:4 after sending GET request.

*Body example:*

Body:

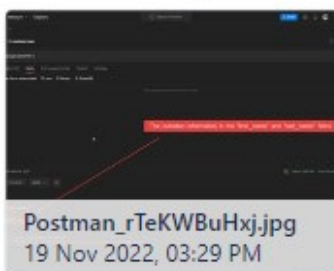

```
{
  "data": {
    "id": 4,
    "email": "eve.holt@reqres.in",
    "first_name": "Valerii",
    "last_name": "Tester",
    "avatar": "https://reqres.in/img/faces/4-image.jpg"
  },
  "support": {
    "url": "Reqres - A hosted REST-API ready to respond to your AJAX requests",
    "text": "To keep ReqRes free, contributions towards server costs are appreciated!"
  }
}

# Reqres.in API. Response returns with "200 OK" status after sending PUT request with invalid body

 Attach

 Create subtask

 Link issue

Priority

Medium

## Description

The response returns with "200 OK" status code after sending PUT request with empty "Key" values in the body.

## Preconditions:

1. Open the Postman

## Steps to reproduce:

1. Execute request

Method: PUT

URI: <https://reqres.in/api/users/10>

Headers:

Content-Type: application/json

Accept: \*/\*

Body:

```
{
  "": "byron.fields@reqres.in",
  "": "parol"
}
```

2. Check the response

3. Pay attention to the **"Key" values** in the request and response body

**Actual result:** The response returns with "200 OK" status code after sending PUT request with empty "Key" values in the body.

*Response returns with the body:*

```
{
  "": "parol",
  "updatedAt": "2022-11-**T**:**:**Z"
}
```

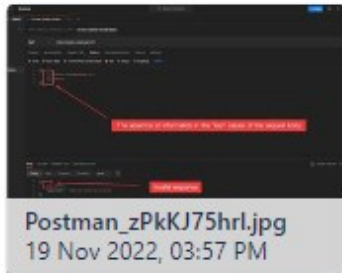

**Expected result:** The response returns with "404 Bad Request" status code after sending PUT request with empty "Key" values in the body.

#### Environment

- **OS:** Windows 10 x64
- **Platform:** Postman v10.3.5

The "Розрахунок вартості" page. The delivery types and costs aren't shown after clicking the "Розрахувати вартість" button.

Priority  Medium

#### Description

The delivery types and costs aren't shown on the "Розрахунок вартості" page after clicking the "Розрахувати вартість" button.

#### Preconditions:

1. Go to the site <https://www.ukrposhta.ua/ua>
2. Click the "Послуги" tab in the navigation menu
3. Click the "Калькулятор" button at the "Сервіси" tab
4. Click accept at the popup

#### Steps to reproduce:

1. Fill in the "Звідки" field with any valid data (e.g. Київ)
2. Set the position in the dropdown list (e.g. м. Київ, Київ р-н, Київ обл.)
3. Fill in the "Куди" field with **valid data** (Ба)
4. Set the position in the dropdown list (**с. Вавилове, Миколаївський р-н, Миколаївська обл.**)
5. Set the "Посилка" type at the "Тип відправлення" section
6. Fill in the "Вара" field with any valid data (e.g. 1)
7. Fill in the "Максимальна сторона" field with any valid data (e.g. 1)
8. Leave all other fields and checkboxes blank
9. Click the "Розрахувати вартість" button
10. Pay attention to the absence of the delivery types and costs section

**Actual result:** The delivery types and costs aren't shown on the "Розрахунок вартості" page after clicking the "Розрахувати вартість" button.

**Expected result:** The delivery types and costs are shown on the "Розрахунок вартості" page after clicking the "Розрахувати вартість" button.

## The feedback page. The validation message about access restrictions to the form sending function is shown

### Description

The validation message about access restrictions to the form sending function is shown on the feedback page after form sending.

**Pre-conditions:** The user must be registered and **logged in**.

### Steps to reproduce:

1. Go to the site <https://www.puf-star.com.ua>
2. Click the “ОТЗЫВЫ” button in the header.
3. Fill in all required fields with any valid data.
4. Click the “Отправить сообщение” button.
5. Pay attention to the validation message.

**Actual result:** The validation message “Вы относитесь к группе пользователей, которым запрещено совершать данное действие.” is shown on the feedback page after form sending.

**Expected result:** The feedback form is successfully sent on the feedback page.

### Environment

OS: Windows 10 x64

Platform: Chrome v. 106.0.5249.119
